

Salah Zeghdani

Web Developer

zeghdns@gmail.com | +213798922617 | Algiers, Algeria | [linkedin.com/in/zeghdani](https://www.linkedin.com/in/zeghdani) | github.com/hexxt-git | hexxt.dev

Web Developer specializing in React, Next.js, and TypeScript. I design, build, ship, and handle end-to-end delivery (backend, Stripe billing, web analytics, and deployment) - open to frontend roles or full-stack development work.

Professional Experience

Frontend Engineer, bortocall.dz

Dec 2025 - Present

Dar-el-beida, Algiers

- Led the development of the startup's 3 Dashboards and 2 Websites, using a monorepo architecture.
- Reviewed colleague code to ensure compliance with high security, performance, and pixel-perfect design.

Web developer (contract), mi-conseil.fr

Aug 2025 - Dec 2025

Paris, France

- Worked on projects including development of www.thetagpoint.com back-office and client web apps.
- Converted Figma designs to web applications using React with REST API integration.

Frontend Developer, gareeb.io

Jan 2025 - Aug 2025

Remote, Algiers

- Gained experience collaborating within a large team of senior engineers while contributing to major features, including the interface for Wizabot.
- rewrote the QFarming web application, focusing on Mapbox integration and real-time data visualization.

Projects

advice4cloud TCO Calculator (<https://calculator.advice4cloud.com>)

- Built and deployed a fully functional SaaS calculator tailored to client business needs, currently generating €100/month per client.
- Integrated AI-powered features and recurring subscription payments via Stripe, while maintaining and operating the product in production.

3chrin.com

- Built a web-based micro-learning platform for baccalaureate students, featuring interactive lessons, progress tracking, and gamified streaks.
- Launched now live with a growing community and curated content across math, physics, and natural sciences.

anime-sdk (<https://anime-sdk.hexxt.dev>)

- A TypeScript SDK for searching anime and manga across 12 sources and resolving direct stream URLs.
- Built for making websites, mobile apps, servers, cli tools and any other user experience.

High Level Interpreted Programming Language (<https://github.com/hexxt-git/bbee-lang>)

- An exercise in parsing syntax using a Pratt parsing algorithm turned into a high-level programming language.

Education

freecodecamp.org

Jan 2022

Accelerated Courses in web development

University of Science and Technology Houari Boumediene

Engineer's degree

Skills

Frontend: React, NextJs, TailwindCSS, HTML5, CSS3, JavaScript ES6, TypeScript, Tanstack Libraries, Web Design, Figma

Backend: Node.js, NestJs, Express, Prisma, SQL (PostgreSQL, MySQL), REST APIs, tRPC APIs, Linux, Rapid Prototyping, Problem-Solving

Languages

English | French | Arabic
